*Take measurements and cut the plasterboard*

*Insert the spot*

*Screw the spot together with the plasterboard*

*Plaster spot and wall and paint with desired color*

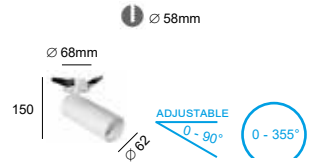

For the correct placement of recessed lights, we suggest to use a sample of the product before you proceed with the cutting of the plasterboard.

## Completely invisible

The plaster recessed spotlights are the latest trend in architectural lighting. Ideal for all living spaces and styles, the ceramic spots can be painted, creating a completely invisible lighting effect becoming one with the surroundings and creating a pleasant environment.

*Take measurements and cut the plasterboard*

*Insert the spot*

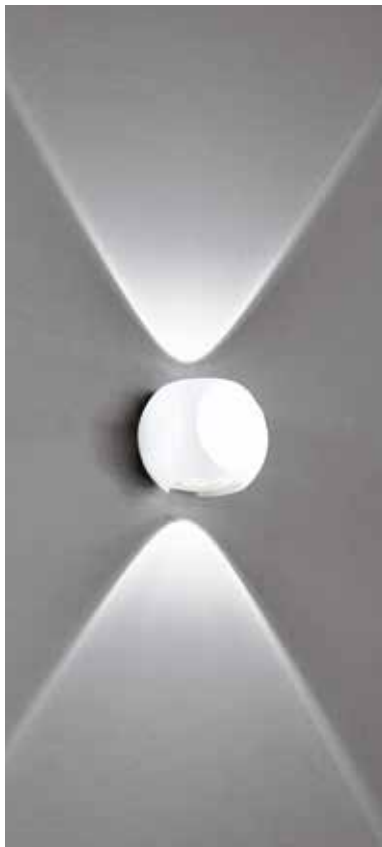

*Screw the spot together with the plasterboard*

*Plaster spot and wall and paint with desired color*

For the correct placement of recessed lights, we suggest to use a sample of the product before you proceed with the cutting of the plasterboard.
